Professional Summary

Detail-oriented IT graduate with a passion for application support, systems management, and cloud hosting. Completed internship at Emirates Institute of Finance (EIF) with hands-on exposure to AWS server deployment and trained in handling Moodle LMS portal as an administrator. Skilled in network troubleshooting, user support, and IT operations. Seeking to apply support skills and technical expertise in a dynamic IT environment.

Core Skills

Technical Skills

- Application Support & Troubleshooting
- Moodle LMS Configuration & Administration
- AWS EC2 Hosting & Monitoring
- Networking: Router Setup, System Maintenance
- Arduino, Raspberry Pi, IoT Integration

Soft Skills

- Clear Communication
- Fast Learner & Adaptable
- Analytical Thinking
- Team Collaboration

EDUCATION

Bachelor of Science in Computer Science

University of West London | Graduated 2025

Relevant Courses: Software Engineering, Operating Systems, Web Technologies, Database Management Systems, Networking & Security, Mobile Application Development

Certifications & Training

- AWS Server Hosting – Emirates Institute of Finance (EIF)
- Moodle LMS Administration – Emirates Institute of Finance (EIF)
- Ethical Hacking – Self-learned
- Python Programming (Tkinter & Arduino Integration)

EXPERIENCE

IT Intern – Application Support   Present
Emirates Institute of Finance (EIF)- 2025   Sharjah

- Trained in handling Moodle LMS portal as an administrator: user setup, course creation, backups, and access rights
- Supported deployment and monitoring of AWS EC2 servers used for e-learning services
- Assisted with system maintenance, troubleshooting, and user support for academic staff
- Documented technical support issues and contributed to resolving IT tickets efficiently

STEM Trainer – Robotics & IoT   Present
Junkbot Robotics - (DEC 2023)   Sharjah

- Conducted sessions on Arduino and IoT for students and trainees
- Developed training modules and assisted in project-based learning

IT & Quality Associate

Present
Sharjah

[Al Falaj Perfumes Industry LLC](#)

- Provided internal tech support for production and office systems
- Managed router/printer setup and troubleshooting
- Maintained quality compliance documentation using digital tools

IT Support Assistant (Part-Time)

DEC 2023
Sharjah

Du Telecom "alo Wifi"

- Installed and troubleshot networking devices including routers and cables
- Supported day-to-day technical setup for client-side devices

Projects

Perfume Smell Detection and Base Note Identification System

- Final Year Project using Arduino (MQ-5), Python (Tkinter), and Serial Communication
- UI to display perfume category based on sensor values
- Included time-stamping, reset function, and real-time image display

Moodle LMS Deployment – EIF Internship

- Installed Moodle on AWS EC2 and configured the LMS for academic staff
- Managed users, roles, permissions, SCORM content, and backups
- Trained academic coordinators in using the system efficiently

AWS Server Deployment – EIF Internship

- Hosted web application on EC2 with Ubuntu and Apache stack
- Managed server security and uptime monitoring
- Used SSH and IAM for secured access
